

NISANTH ALEX

Senior Frontend Engineer | React.js | JavaScript | TypeScript | Figma

Kerala, India | 9496339622 | nisanthalex@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Senior Frontend Engineer with 11+ years of **UI development experience** and 6.5+ years specializing in **React.js, JavaScript, and TypeScript**.

Experienced in building scalable web applications, enterprise dashboards, reusable component libraries, and design systems. Strong **UI/UX design expertise using Figma**, including wireframing, prototyping, and user-centric design.

Skilled in frontend architecture, performance optimization, state management, REST API integration, and technical leadership within Agile teams.

Technical skills

Frontend Technologies : React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Practices : Accessibility (WCAG), Responsive Design, Cross-Browser Compatibility, Performance Optimization, Component-Based Architecture, Reusable UI Development

State Management: Redux Toolkit, Zustand, Context API

Data Fetching & APIs : React Query (TanStack Query), Axios, REST APIs

UI Frameworks : Material UI, Ant Design, Bootstrap

Testing: Jest, React Testing Library

UI/UX Design : Figma, Wireframing, Prototyping, User Flows, Design Systems

Tools & Platforms : Git, GitHub, Jenkins, SonarQube, NPM, GitHub Copilot, Cursor AI, ChatGPT

Additional Technologies & Backend Exposure : Electron.js, Node.js, Python, Express.js

Professional Experience

Senior Software Engineer – Frontend

Quest Global, Thiruvananthapuram, Kerala | Nov 2021 – April 2026

Responsibilities & Achievements

- Developed scalable enterprise applications using React.js, JavaScript, and TypeScript.

- Designed and maintained reusable component libraries, reducing development effort across teams by approximately 30%.
 - Built responsive and accessible user interfaces from Figma designs.
 - Implemented state management using Redux Toolkit, Zustand, and Context API.
 - Integrated REST APIs and managed complex application data flows.
 - Improved application performance through lazy loading, memoization, and API optimization, significantly reducing page load times and improving user experience.
 - Collaborated with UX designers, backend teams, and stakeholders to deliver user-focused solutions.
 - Developed unit and component tests using Jest and React Testing Library.
 - Contributed to CI/CD pipelines using Jenkins and maintained code quality standards through SonarQube.
 - Mentored junior developers and conducted technical reviews to improve code quality and maintainability.
 - Participated actively in Agile ceremonies, sprint planning, estimation, and release activities.
-

UI Developer / Frontend Developer

PiServe Technologies, Kochi, Kerala | Jan 2015 – Oct 2021

Responsibilities & Achievements

- Developed responsive and cross-browser compatible user interfaces using HTML5, CSS3, JavaScript, and React.js.
 - Built reusable frontend components and modular application structures.
 - Created user-friendly interfaces from Figma and design specifications.
 - Integrated REST APIs and backend services into React applications.
 - Optimized application performance using lazy loading and code-splitting techniques.
 - Implemented dynamic UI interactions and animations to enhance user experience.
 - Customized and maintained WordPress themes and websites.
 - Managed website performance, security, and deployment activities.
 - Collaborated closely with designers, developers, and stakeholders to deliver high-quality solutions.
-

Key Projects

AI Model Deployer

Technologies: React.js, Electron.js, Material UI, Context API, Python APIs

- Developed a cross-platform application supporting AI and machine learning model deployment workflows.
- Designed intuitive user interfaces for dataset management, model training, and deployment processes.
- Built reusable UI components and dynamic configuration panels.
- Integrated backend APIs and Python-based services.
- Optimized application performance for large datasets and complex user interactions.
- Improved workflow efficiency through streamlined user experiences.

Power Profiler

Role: UI/UX Designer & Frontend Engineer

Technologies: Figma, React.js, TypeScript, Redux Toolkit

- Led end-to-end UI/UX design activities for a connectivity and power profiling platform.
- Created wireframes, user flows, prototypes, and high-fidelity designs using Figma.
- Designed dashboards and visualizations for complex engineering data.
- Collaborated with engineering teams to ensure accurate implementation.
- Defined reusable UI patterns and design standards across the application.

Onco Pro – Healthcare Analytics Dashboard

Technologies: React.js, React Query, Zustand, Node.js APIs

- Developed interactive healthcare analytics dashboards.
- Integrated large-scale healthcare data through REST APIs.
- Implemented reusable design system components.
- Optimized data fetching and caching strategies using React Query.
- Improved dashboard responsiveness through state and rendering optimizations.

NX WebPerformer – Low-Code Platform

Technologies: React.js, Material UI, REST APIs

- Developed configurable workflow management interfaces.
- Created reusable and scalable frontend components.
- Integrated REST APIs for real-time workflow configuration.
- Designed intuitive user experiences for non-technical users.

Education

Master of Computer Applications — Rajagiri College of Social Sciences, Kochi, Kerala
BSc Computer Science — College of Applied Sciences, Thodupuzha, Kerala
